

GE Healthcare & 495 MetroWest Partnership

December 15, 2015

imagination at work

Our Business, Mission, and Strategy

GE Healthcare Life Sciences

Accelerating precision medicine with tools for biotechnology R&D, biopharma manufacturing, cell therapy & regenerative medicine, diagnostic imaging, molecular & precision diagnostics

Research & Applied Markets

Tools for drug R&D

Protein purification interaction & analytics

Cell technologies

Human ID & environmental analysis

BioProcess

Tools for biopharma manufacturing & cell culture

Chromatography & filtration systems

Process Development

Single-use systems and turn-key Enterprise Solutions

InVitro Diagnostics

Advanced oncology diagnostics services

Next-Generation sequencing

Pharma biomarker collaborations

Services

Lab-wide strategic solutions

System life-cycle services

Scientific asset management
Validation

Core Imaging

Leading-edge contrast agents for diagnostic imaging

Nuclear medicine & PET tracers for diagnostic imaging & research

Five product business units • 10 000 people • 100+ countries • UK HQ Manufacturing, research & development in US, Europe and Asia

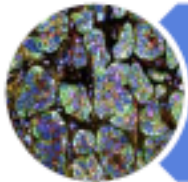

We accelerate molecular & precision medicine

We enable precise clinical decisions by providing advanced in-vivo imaging agents & in-vitro diagnostic services

We drive productivity for the biopharma industry & create biologics capacity in under-served markets

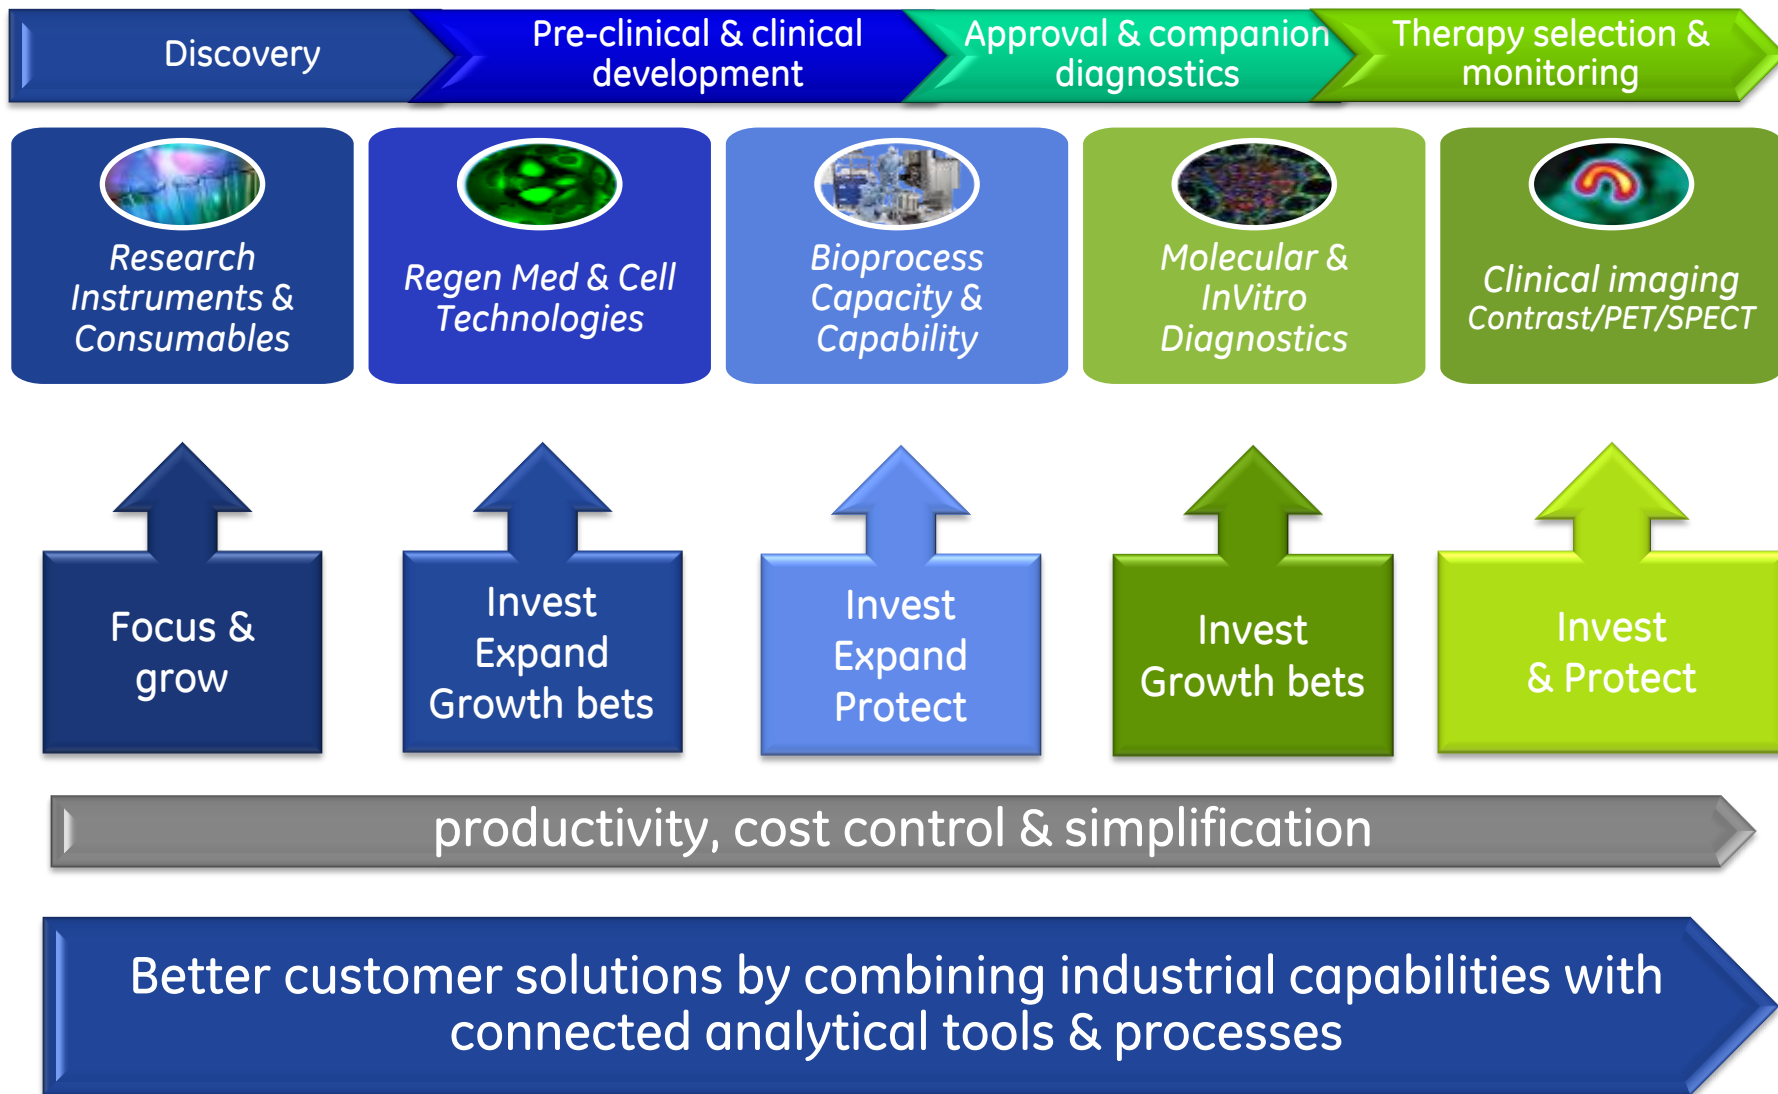

We empower researchers with innovative tools & analytics for protein, genetic & cell-based research & development

We create the future of regenerative medicine and cell therapy with customers by providing novel technologies and methods

Our mission and purpose

Life Sciences business strategy

100 Results Way, Marlborough
